

TIPS FOR A SAFER INTERNET

Keep your information and your customer's data private

Businesses rely on constant online interactions, from managing customer data to collaborating with employees. Keeping information secure is crucial, use these tips to protect your business.

VERIFY THE SENDER

before interacting with emails, text messages, or any kind of digital communication. If you can't verify the authenticity, report it, and delete the message immediately.

USE SECURE NETWORKS

when handling company data. If you must connect via public WiFi network, be sure to do so using a Virtual Private Network (VPN).

KEEP DEVICES UPDATED

by regularly updating your company's software and security protocols, ensuring all devices meet the latest security standards.

DISABLE EXTERNAL STORAGE DEVICES

like USB drives and external hard drives, which can be accessed by unauthorized users.

ENABLE MULTI-FACTOR AUTHENTICATION

to add an extra layer of security and prevent unauthorized access, even if your password is compromised.

USE AN IDENTITY MANAGEMENT

solution to control and monitor who has access to sensitive data to minimize the risk of unauthorized access.
